

Anand NENE

Dr. Anand Nene originally trained as an orthopaedic surgeon in Mumbai, India and in the United Kingdom. He worked as a Medical Research Fellow in the Orthotic Research & Locomotor Assessment Unit (ORLAU) at the Robert Jones and Agnes Hunt Orthopaedic Hospital in Oswestry. He worked on orthotic locomotion for persons with spinal cord injury (SCI). There he also developed his interest in use of Gait Analysis for clinical decision making in Cerebral Palsy. In January 1994 he arrived in the Netherlands. He was awarded PhD for his work on SCI locomotion. He retrained as a specialist in Physical Medicine and Rehabilitation (PMR). He worked as a specialist in PMR in Het Roessingh Rehabilitation Centre and also as a Research Fellow in Roessingh Research & Development. He retired as specialist in PMR in September 2014 but continues to work as a research fellow. His research interests are balance and gait abnormalities in neurological disorders, pathophysiology and management of spasticity and improvement of arm-hand functions in tetraplegia.
