

Laurent TATU

Head of Department of Anatomy
Faculty of Medical Sciences, University of Franche
Comté, Besançon (France)

Head of Department of Neuromuscular Diseases
Centre Hospitalier Régional Universitaire
Besançon (France)

Member of Research Group EA 481 "Integrative Neurosciences" University of Franche-Comté

Experience in Botulinum Toxin Therapy

Botulinum toxin therapy in cervical, facial and focal dystonias with EMG-guidance. Setting-up of anatomic training workshops applied to botulinum toxin (Department of Anatomy, University of Franche-Comté, Besançon). Tutor in Botulinum toxin training courses (University of Freiburg (Germany) Prof. W. Jost).

Main Research Interest

Muscular morphologic and functional anatomy applied to Botulinum toxin therapy.
