

Prof. Dr. Laurent Tatu

Head of Department of Anatomy - Medical School,
University of Franche-Comté, Besançon (France)
Head of Department of Neuromuscular Diseases - Centre
Hospitalier Universitaire, Besançon (France)
Member of Research Group "Integrative Neurosciences"
University of Franche-Comté.

Experience in Botulinum toxin therapy:

Botulinum toxin therapy in cervical, facial and focal dystonias with EMG and ultrasound guidance.

Setting-up of anatomic training workshops applied to botulinum toxin (Department of Anatomy, University of Franche-Comté, Besançon).

Trainer in Botulinum toxin courses (Freiburg - Germany, Prof. W. Jost) 2013 - 2016.

Trainer in Toxin Academy courses (Fribourg - Switzerland, Dr. Koçer) since 2016.

Main research interest:

Muscular morphologic and functional anatomy applied to Botulinum toxin therapy.
